Responsive Web Development - Final Project

Your Name - Your Project's Title

1 of 32: Showcase your Website

Open your website on a browser, and answer these questions:

- a) What is your website about?
 - Mindset is a daily self-care and wellness platform with a library of authentic and intimate audio collections from your favorite artists.
- b) What pages and content does it have?
 - It includes features overview, user reviews, frequently asked questions, and a subscription feature to receive updates.
- c) How do you navigate through your website?
 - You can see whole feature in the root page, and explore other pages like Shop, Join Now, Careers.

My Project

The screenshot shows the homepage of the Mindset app. At the top, there is a navigation bar with the brand name "MINDSET" and "BY DIVE STUDIOS" on the left, and "Shop", "Join Now", and "Careers" on the right. Below the navigation bar, there is a large green banner with the text "Self-Care, Made Easy". Underneath the banner, there is a paragraph of text: "Mindset makes daily self-care and wellness easy, accessible, and a priority for people worldwide through authentic storytelling and story sharing." Below the text, there are two download links: "Download on the App Store" and "GET IT ON Google Play". To the right of the banner, there is a grid of images featuring various artists. A smartphone screen is displayed, showing a profile of an artist named "VERNON" with the subtitle "Friendship • Happiness • Identity". The phone screen also shows a "Play Now" button and tabs for "Overview", "Stories", and "Gallery". At the bottom of the page, there is a section titled "Featured in" with logos for TIME, Hollywood, billboard, teenVOGUE, Forbes, AP, and TC. There is also a "OUR PARTNERS" section with the text "Partnered with".

Responsive Web Development - Final Project

Your Name - Your Project's Title

2 of 32: Share your GitHub repository

Answer these questions:

a) Is your project on GitHub?

- Yes.

b) How can a potential employer check it out? (clone)

- I made sure that all the pages can be viewed in the README, and employer can check the features used to create a responsive page.

Repository Link:

3 of 32: Showcase Git VCS

Answer these questions:

a) Did you use Git VCS with your project?

- Yes.

b) Do you have at least 20 commits in your project?

- Yes.

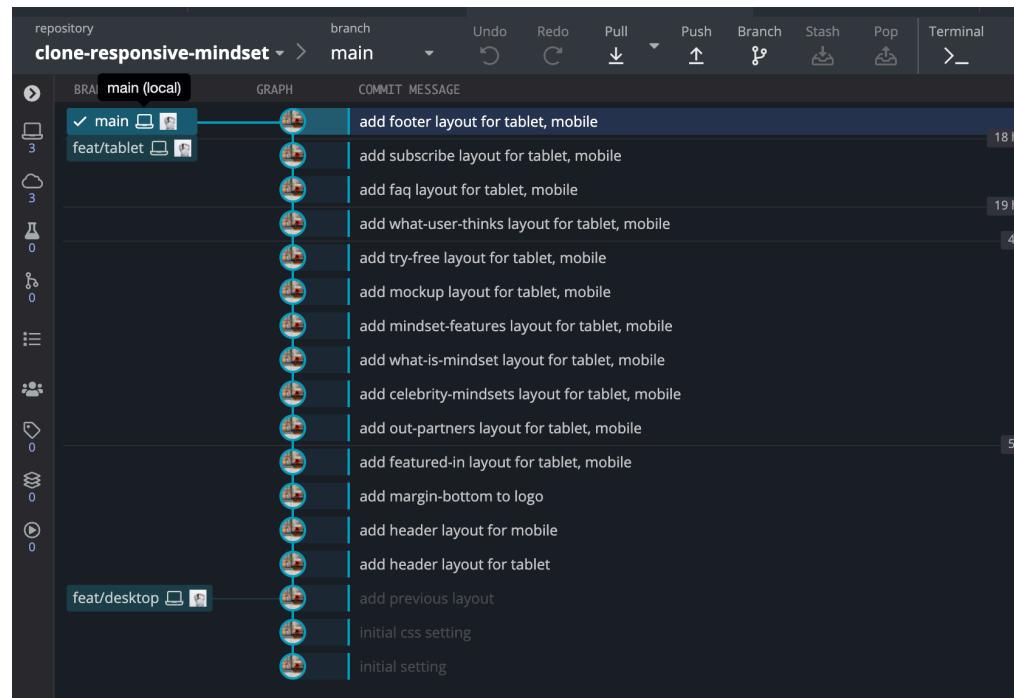

c) How did you write your commit messages?

- By clearly separating changes, such as committing CSS and layout updates individually, to ensure each commit was focused and easy to track.

d) Did you use branches? If yes, how?

- I used two branches excluding the main branch to work on different screen sizes.

Git VCS

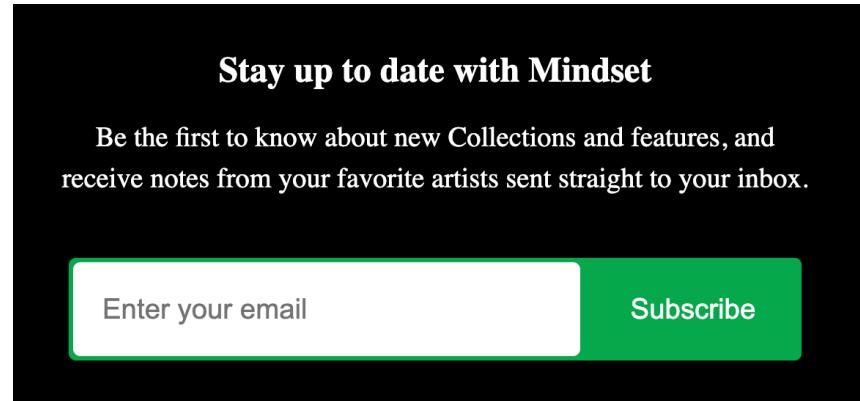

HTML5 Form

4 of 32: Showcase HTML5 Form

Answer these questions:

- a) Do you have a form element in your website?
- b) How is the HTML of your form structured?
- c) What input fields and labels does your form have?
- d) What attributes are used in the elements of the form?
And why?
- e) Is there a button in the form?

```
<form class="button-container-general">
  <input type="text" placeholder="Enter your email" />
  <button type="submit">Subscribe</button>
</form>
```

5 of 32: Showcase Advanced Selectors

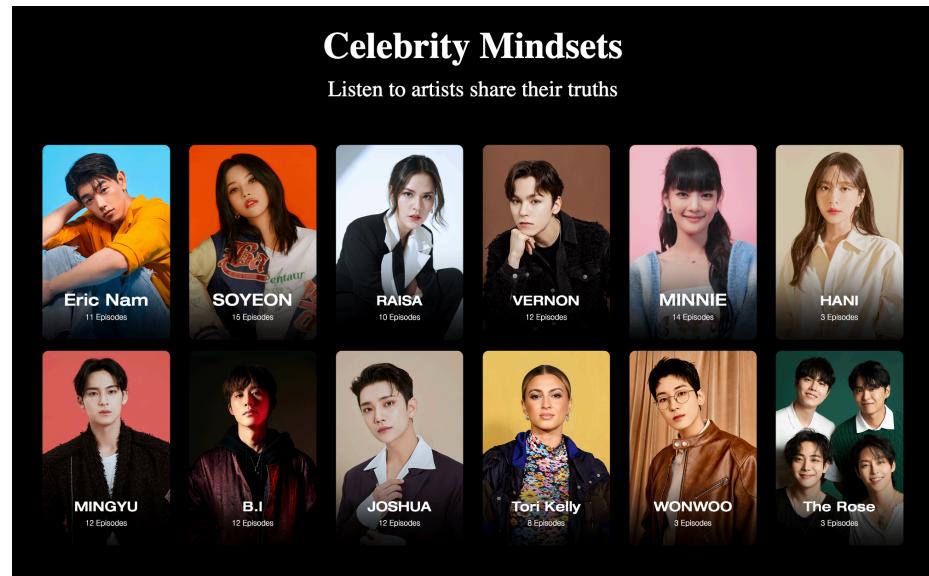

Answer these questions:

- a) Can you show an example of at least one of the following?
- i) Attribute Selector
 - ii) Combinator Selector
 - iii) Child or Sibling Selector

- I used a child selector to apply CSS to a specific img tag.

```
.mindset-features-container > .image-box > img {  
    width: 80%;  
    height: auto;  
}
```

Advanced CSS Selectors

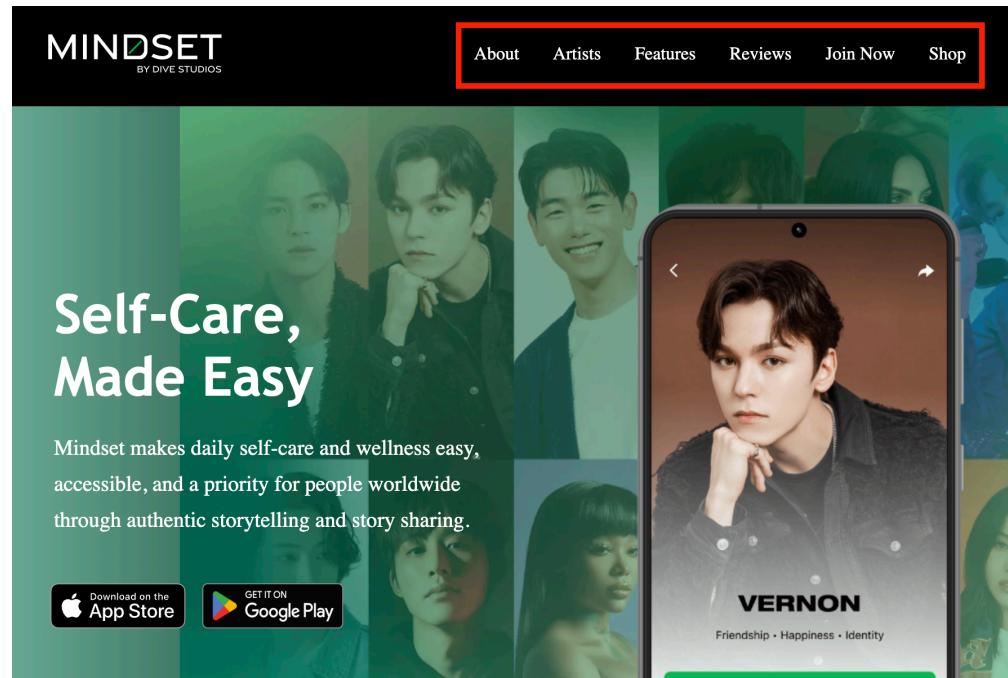

6 of 32: Showcase Selector Chaining

Answer these questions:

- a) Can you show an example of selector chaining?
- I used selector chaining to apply styles specifically to the a tags within the navigation.

```
13  nav > ul > li > a {  
14    color: #fff;  
15    font-size: 1rem;  
16  }
```

CSS Selector Chaining

7 of 32: Showcase Selector Grouping

Answer these questions:

- a) Can you showcase an example of how you used selector grouping?

- I used selector grouping to apply same css to text element.

About Artists Features Reviews Join Now Shop

Celebrity Mindsets

Listen to artists share their truths

DAILY CHECK-IN

The Daily Check-In feature is a quick and easy 5-minute daily routine that makes practicing self-care and wellness simple and effortless.

Make self-care a daily habit today.

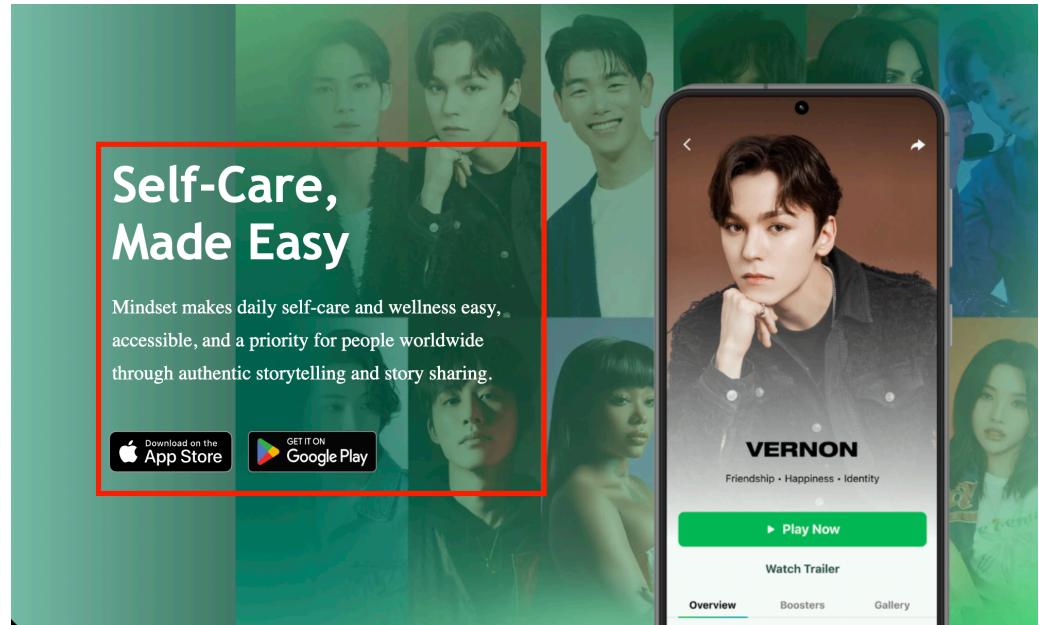

```
14
15 .partners-heading,
16 .featured-in-title,
17 .partner-name-text,
18 .section-main-header,
19 .section-sub-header,
20 .explanation-sub-header-paragraph,
21 .question-text,
22 .answer-text,
23 .subscribe-container > .title,
24 .subscribe-container > .content,
25 footer > .copyright-text,
26 footer > .info-container .menu-item a {
27   color: white;
28   font-family: "Trebuchet MS", sans-serif;
29 }
```

8 of 32: Showcase Absolute Position

Answer these questions:

- a) Can you show an example of an element with absolute positioning?
- The rest of the page consists of a combination of an image and a gradient background, and I used absolute positioning to place a container with a red border over it for a cleaner layout.

```
27 .header-info-text-container {  
28     position: absolute;  
29     top: 25%;  
30     left: 10%;  
31     display: flex;  
32     flex-direction: column;  
33     justify-content: center;  
34     width: 400px;  
35 }
```

9 of 32: Showcase Relative Position

Answer these questions:

- a) Can you show an example of an element with relative positioning?

- To use the absolute property in the previous layout, the parent element must have the relative property applied.

```
33 /* header */  
34 .linear-gradient-container {  
35   position: relative;  
36   display: flex;  
37   flex-direction: column;  
38   border-bottom-left-radius: 55px;  
39   border-bottom-right-radius: 55px;  
40   background-image: linear-gradient(  
41     to right,  
42     #7abfab 0%,  
43     #2d6450 30%,  
44     #3c7155 70%  
45   );  
46   overflow: hidden;
```

section.linear-gradient-container 910x625

Color #000000
Font 16px Times

CSS Fixed Positioning

10 of 32: Showcase Fixed Position

Answer these questions:

- a) Can you show an example of an element with fixed positioning?
- I used fixed property for fixing navigation.
- This feature is also implemented with using 'sticky'

```
/* navigation */  
nav {  
  position: fixed;  
  z-index: 100;  
  display: flex;  
  flex-direction: row;  
  justify-content: space-between;  
  align-items: center;  
  background-color: black;  
  width: 100%;  
}
```

The screenshot shows the Mindset app interface. At the top is a navigation bar with the logo 'MINDSET' and 'BY DIVE STUDIOS', followed by links for 'About', 'Artists', 'Features', 'Reviews', 'Join Now', and 'Shop'. Below the nav bar are several mobile phone screens displaying different features: a 'Motivation' screen with a purple landscape image; a 'Daily Mood' screen with a green field image and a quote 'You must expect great things of yourself before you can do them.'; a 'Community Reflection' screen with a pink header and a post from a user named 'Hannah' about her daily mood; and a 'Featured' screen showing a post from 'Mindset' with a quote 'Don't be afraid to show...'. The overall design is clean and modern.

What Users Think

Comforting content

The Mindset app is like going to a safe place with friends. The content is so comforting and personal that it helps me feel grounded and reassured that I'm not alone, and gives a feeling of confidence that I can take on anything even if its hard.

My favorite app!

Mindset is the best thing. As someone who struggles a lot with their mental health, it's great to have a place like this where you can go and get advice by listening to others' stories.

11 of 32: Showcase CSS Variables

Answer these questions:

- a) Can you show an example of how you used CSS variables?

- I used CSS variables to predefine colors for consistent usage

```
129 .partners-title {  
130   color: var(--main-green-color);  
131   font-size: 1.5em;  
132 }
```

```
footer {  
  background-color: var(--sub-green-color);  
}
```

```
:root {  
  --main-green-color: #00a84f;  
  --sub-green-color: #245046;  
}
```

CSS Media Queries

12 of 32: Showcase CSS Media Queries

Answer these questions:

a) Can you show how you used CSS Media Queries?

- I used CSS media queries to apply different styles based on screen size, adjusting the layout for various devices.

b) What breakpoints did you use?

- I utilized min-width and max-width to define the breakpoints for different device types, ensuring responsiveness.

c) What device features do you query for?

- I query for mobile, tablet, and desktop devices to provide an optimized experience for each screen size.

d) What conditions do your queries have?

- I used the and operator to combine multiple conditions in my media queries, ensuring precise control over when styles are applied.

The image shows a code editor interface with three tabs: `desktop.css`, `tablet.css`, and `mobile.css`. Each tab displays a snippet of CSS code with a timestamp and author information.

- `desktop.css`:
Content:

```
1 @media (min-width: 1000px) {
```

Timestamp: You, 6 hours ago | 1 author (You)
- `tablet.css`:
Content:

```
1 @media (min-width: 700px) and (max-width: 1000px) {  
2   /* navigation */
```

Timestamp: You, 6 hours ago | 1 author (You)
- `mobile.css`:
Content:

```
1 @media (max-width: 700px) {  
2   /* navigation */
```

Timestamp: You, 6 hours ago | 1 author (You)

CSS Transition

13 of 32: Showcase CSS Transition Property

Answer these questions:

- a) Can you show an example of the transition property used in your project?

```
.accordion:focus + .accordion-content {  
    transition: 2s;  
    max-height: 300px;  
}  
  
.accordion:focus > .accordion-arrow {  
    transition: 0.7s;  
    transform: rotate(180deg);  
}
```

Frequently Asked Questions

What is Mindset?

Mindset is a daily self-care app designed to make daily self-care easy, accessible, and normalized through storytelling and story sharing.

Can I cancel my Mindset subscription anytime?

How do I contact Mindset support?

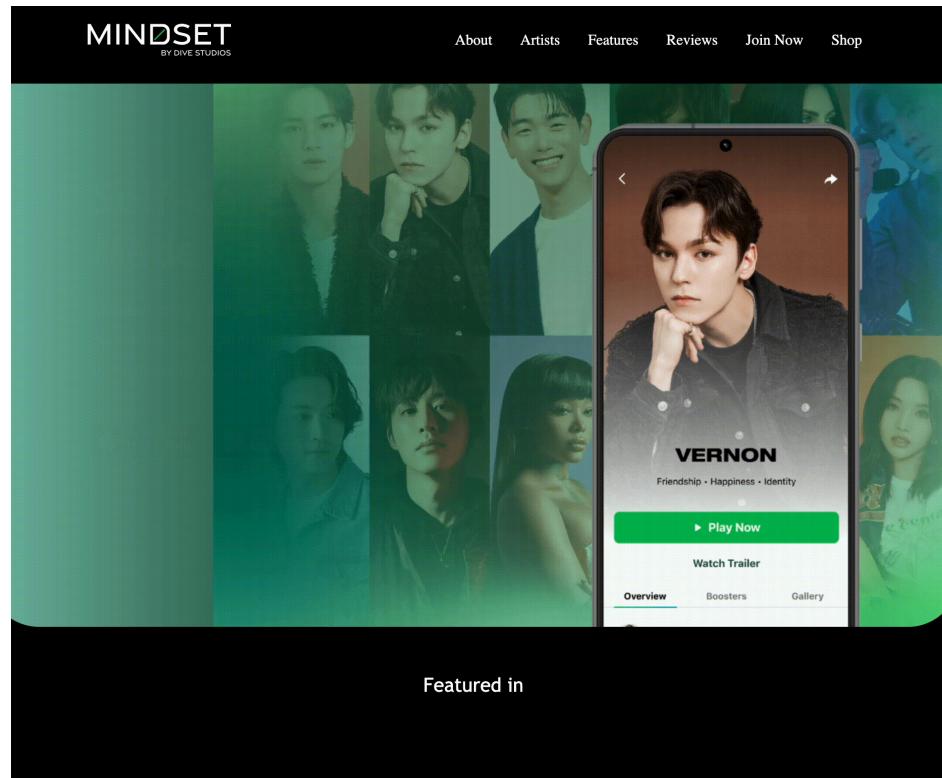

14 of 32: Showcase CSS Keyframe Animations

Answer these questions:

- a) Do you have an example of a keyframe animation in your project?
- b) Which animation properties did you use?

- I used keyframe animation to fade in each element as it appears while scrolling.

```
365 /* Animation for each section */  
366 @keyframes fadeIn {  
367     0% {  
368         opacity: 0;  
369         transform: translateY(20px);  
370     }  
371     100% {  
372         opacity: 1;  
373         transform: translateY(0);  
374     }  
375 }  
376 .fade-in {  
377     opacity: 0;  
378 }  
379 .fade-in.show {  
380     animation: fadeIn 1s forwards;  
381 }  
382 }
```

Featured in

CSS Pseudo-Elements

15 of 32: Showcase CSS Pseudo-Elements

Answer these questions:

- a) Can you show an example of at least one pseudo-element used in your project?

- I used a 'focus' pseudo-class to apply a transition when the user clicks the button, causing the FAQ accordion to open

```
302 .accordions {  
303   .accordion: focus + .accordion-content {  
304     transition: 2s;  
305     max-height: 300px;  
306   }  
      You, 3 hours ago • add transition to t
```

Flexible Images' CSS

17 of 32: Showcase Flexible Images CSS

Answer these questions:

a) How do you maintain aspect ratio of images?

-I used object-fit: contain

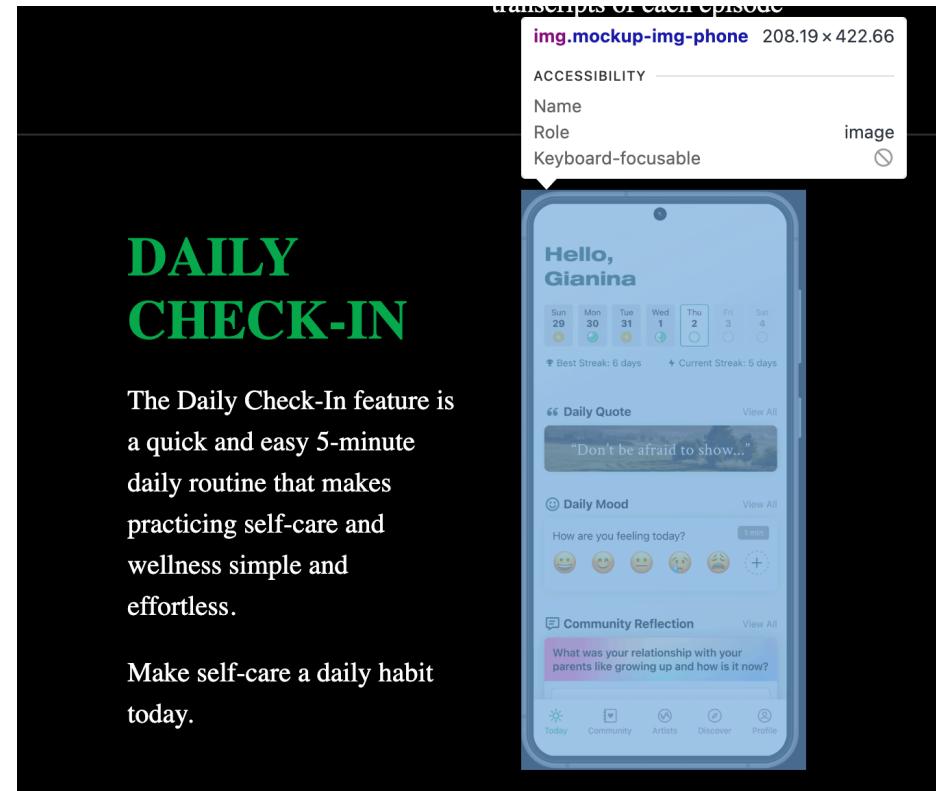

b) How do you prevent images from getting distorted
(squished or stretched)?

- By using object-fit: contain, I can ensure that images scale proportionally without being squished or stretched.

c) How do you prevent images from overflowing?

- I can prevent images from overflowing by setting max-width:
70% and height: auto

```
147 .mockup-img-phone {  
148   width: 70%;  
149   height: auto;  
150   object-fit: contain;  
151 }
```

CSS Units

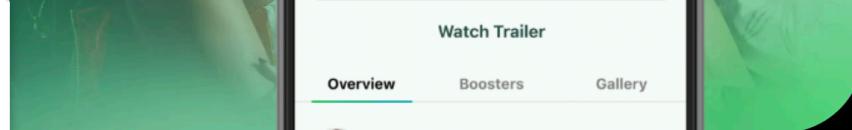

18 of 32: Showcase CSS Units

Answer these questions:

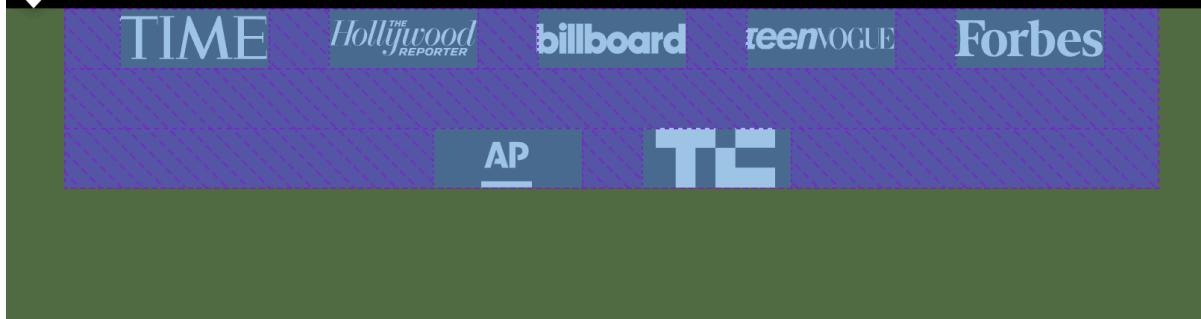

- a) Can you show examples of how you use Relative Units for Responsive Design in your project?
- b) Did you use % and/or viewport units? How?

- I used percentage-based padding to ensure smooth adjustments on the sides as the screen size changes.

57    padding: 0px 5% 100px 5%;  
58  }
```

19 of 32: Showcase Responsive Typography

Answer these questions:

- a) Can you show an example of how you achieve responsive typography in your project?
- b) Did you use em and rem units?
- c) What font-sizes are you using and why?

Responsive Typography

The screenshot shows a web page with a dark green header containing the logo 'MINDSET BY DIVE STUDIOS'. Below the header, there is a large blue rectangular area with the text 'Self-Care, Made Easy' in white. At the bottom of this area, there is some smaller text: 'Mindset makes daily self-care and w...'. A tooltip is displayed over the first instance of 'Self-Care, Made Easy', providing details about its CSS styling.

20 of 32: Showcase Semantic Section Tags

Answer these questions:

- a) Can you show how you used <div> elements only for non-semantic sections?
- b) Can you show how you used semantically meaningful tags for your page sections?
- c) Did you use <header>, <nav>, <main>, and <footer>?
- d) Did you use <section> with aria role and label?
- e) Did you use <aside>? (optional)

- I used the section tag to clearly divide each section, while other elements are organized using div tags.

Semantic Sections Markup

```
55
60    <!-- Featured in -->
61  >  <section class="featured-in-container">...
78    </section>
79
80    <!-- Our Partners -->
81  >  <section class="partners-container">...
130   </section>
131
132    <!-- Celebrity Mindsets -->
133  >  <section class="celebrity-mindsets-container">...
155   </section>
156
157    <!-- What is Mindset? -->
158  >  <section class="what-is-mindset-container">...
183   </section>
184
185    <!-- Mindset Features -->
186  >  <section class="section-header-container">...
188   </section>
189
190    <!-- CELEBRITY MINDSETS -->
191  >  <section class="mindset-features-container">...
223   </section>
251     <section class="mindset-features-container" >

193         
194       </div>
195     </section>
```

21 of 32: Showcase Semantic Content Tags

Answer these questions:

- a) Can you show how you used semantically meaningful elements instead of non-semantic ones? For example:
- i) `` instead of ``
 - ii) `` instead of `<i>`
 - iii) Text inside `<p>`, `<a>`, and headings

- I used the `<p>` tag to display long blocks of text content.

```
<h2 class="explanation-main-header">WHAT IS MINDSET?</h2>
<p class="explanation-sub-header-paragraph">
    Mindset is a daily self-care and wellness platform with a library of
    authentic and intimate audio collections from your favorite artists.
</p>
<br />

<p class="explanation-sub-header-paragraph">
    In a hyper-connected world where we feel more isolated than ever,
    Mindset is flipping the script by harnessing the magnetic power of
    fame to create space where we feel safe to be seen.
</p>
<br />

<p class="explanation-sub-header-paragraph">
    Like a smile, vulnerability is contagious. When we share our truth
    fearlessly, we shine light into darkness and reveal how much more
    there is that unites us than divides us.
</p>
<br />
```

22 of 32: Showcase Semantic Heading Placement

Answer these questions:

- a) Can you show how you used heading elements on your website?
- b) Did you use the correct level of heading in the proper location, section, and level?

```
<h1 class="section-main-header">Celebrity Mindsets</h1>
```

```
<h1 class="section-main-header">Mindset Features</h1>
```

```
  <h1 class="section-main-header">Try for free today!</h1>
```

```
<h1 class="section-main-header">What Users Think</h1>
```

```
139 .section-main-header {  
140   font-size: 2.5rem;  
141   color: white;  
142   margin-top: 20px;  
143 }
```

404 Not Found Page

26 of 32: Showcase 404 Not Found Page

Answer these questions:

- a) Did you include a 404 Not Found page?
- b) Is your page html file named 404.html? If not why?
- c) Does your 404 page tell the user what happened?
- d) Can users navigate back home from the 404 page?

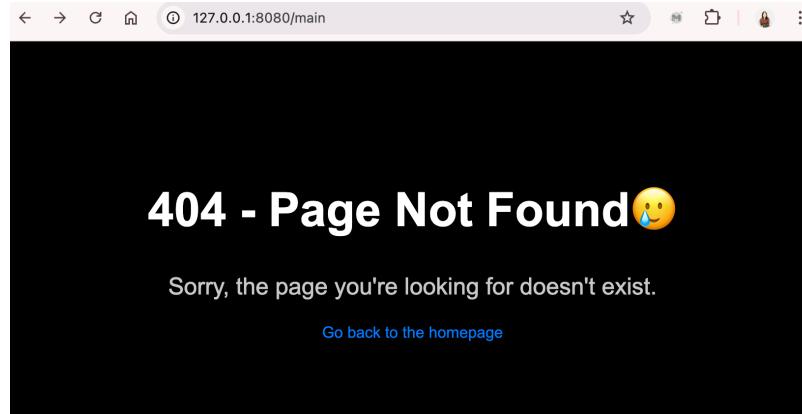

- To include the 404.html page, I added a .htaccess file and executed npx http-server . to view it. When I enter a non-existent page, like /main.html, the 404.html page is correctly displayed.

```
htaccess U X
htaccess
1 ErrorDocument 404 /404.html
```

The terminal window shows a .htaccess file with the following content:

```
ErrorDocument 404 /404.html
```

404.html ×

```
404.html > html > head > style > p
2   <html lang="en">
3     <head>
7       <style>
8         body {
13       }
14       h1 {
15         font-size: 3rem;
16         color: white;
17       }
18       p {
19         font-size: 1.5rem;
20         color: #c8c8c8;
21       }
22       a {
23         color: #007bff;
24         text-decoration: none;
25       }

27 of 32: Showcase Responsive Image Gallery

Answer these questions:

- a) Image galleries are common in websites, do you have an image gallery on your website?
- b) Is your gallery responsive for smartphone, tablet, and desktop screens?

- I used a grid system to arrange the images for desktop, tablet, and mobile layouts.

```
<section class="cards-grid-container">
  
  
  
  
  
  
  
  
  
  
  
  
</section>
```

Responsive Image Gallery

```
/* celebrity-mindsets */
.cards-grid-container {
  display: grid;
  padding: 0px 5%;
  grid-template-columns: repeat(6, 15%);
  grid-template-rows: repeat(2, auto);
  gap: 2%;
}
```

```
/* celebrity-mindsets */
.cards-grid-container {
  display: grid;
  grid-template-columns: repeat(3, 28%);
  grid-template-rows: repeat(4, auto);
  gap: 3%;
  justify-content: center;
}
```

28 of 32: Showcase FAQ Accordions

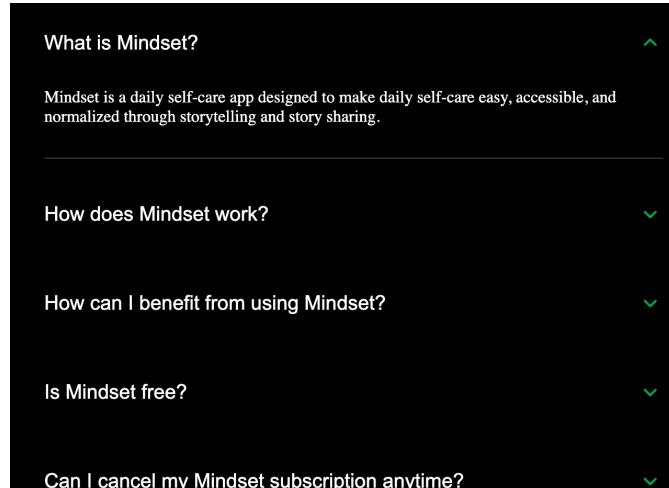

Answer these questions:

- a) Accordions and FAQs are common in websites, do you have an FAQ accordion on your website?
- Yes. When I click each question, it will open.

```
279
280 .accordion {
281   cursor: pointer;
282 }
283 .accordion-content {
284   max-height: 0px;
285   overflow: hidden;
286 }
287 .accordion:focus + .accordion-content {
288   transition: 2s;
289   max-height: 300px;
290 }
291 .accordion:focus > .accordion-arrow {
292   transition: 1s;
293   rotate: 180deg;
294 }
295 .accordion:hover {
296   opacity: 0.9;
297 }
```

FAQ Accordions

```
<div class="qna-container">
  <button class="question-container accordion">
    <div class="question-text">What is Mindset?</div>
    
  </button>
  <div class="answer-text accordion-content">
    Mindset is a daily self-care app designed to make daily self-care
    easy, accessible, and normalized through storytelling and story
    sharing.
    <div class="division division-faq-gap"></div>
  </div>
</div>
```

29 of 32: Showcase CSS Library

Answer these questions:

- a) Can you talk about what is Native CSS code in your project, what what is not?
- b) Most of your CSS should be native code, however do you have an example of a CSS Library and how you used it in your project

CSS Library

- a) Native CSS refers to the custom styles I wrote from scratch, including layout, typography, animation, etc.
- b) I didn't use any CSS library in my project because it doesn't need to rely on one.

30 of 32: Showcase Optimized Images

Answer these questions:

- a) Did you use images with Webp format? If not why?
- b) What is the file size of the images on your project?

- I mostly use image URLs when rendering images to reduce webpage size, but when I need to use local images, I use WebP format to minimize image size. The average WebP size is about 30KB.

Name	^	Date Modified	Size	Kind
 reviewer-1.webp		8:56 AM	31 KB	WebP Image
 reviewer-2.webp		8:56 AM	30 KB	WebP Image
 reviewer-3.webp		8:56 AM	35 KB	WebP Image
 reviewer-4.webp		8:56 AM	45 KB	WebP Image
 reviewer-5.webp		8:56 AM	34 KB	WebP Image
 reviewer-6.webp		8:56 AM	20 KB	WebP Image

Optimization: Images

What Users Think

**Comforting content**

The Mindset app is like going to a safe place with friends. The content is so comforting and personal that it helps me feel grounded and reassured that I'm not alone, and gives a feeling of confidence that I can take on anything even if its hard.

**Debbie Moffat**

**My favorite app!**

Mindset is the best thing. As someone who struggles a lot with their mental health, it's great to have a place like this where you can go and get advice by listening to others' stories.

**Dicte Rejmers**

**Best way**

There have been times where I've been down and I turn back to this app because I'm able to listen to stories and it always makes me assure myself that I'm not alone.

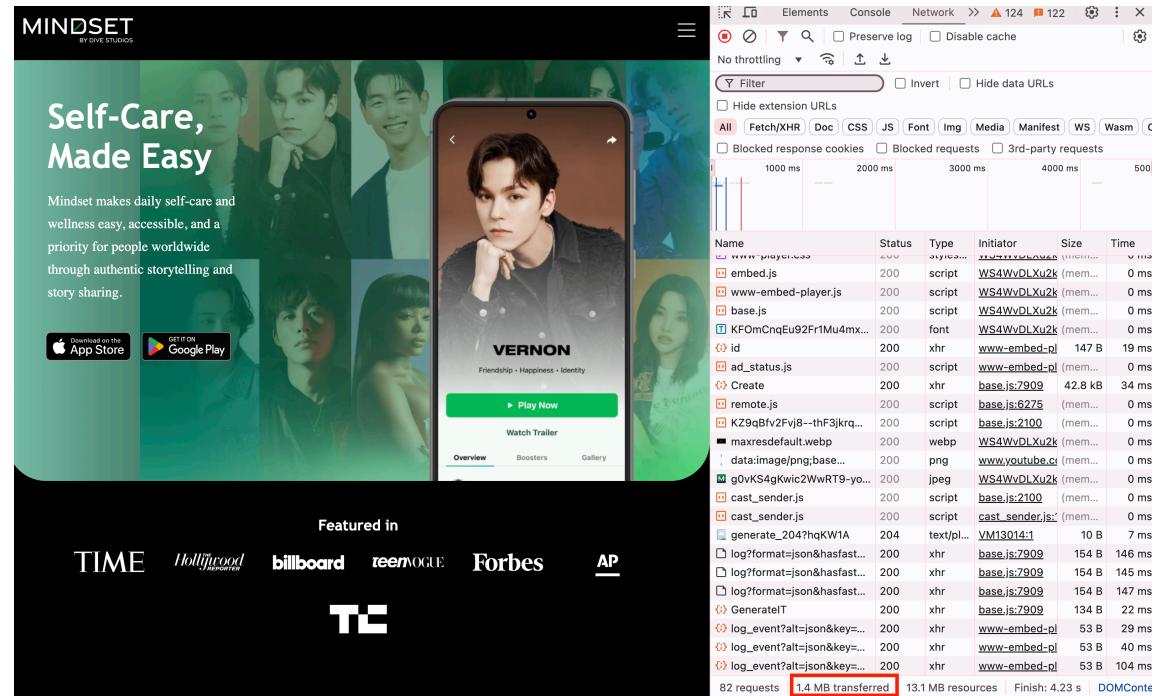

31 of 32: Showcase Optimized Page Size

Answer these questions:

- a) Does your website have a reasonable file size? (does not exceed 3MB per page)

- The webpage size is 1.4MB. I used image URLs for most of the images instead of local files. When I needed to use local images, I primarily used SVG or WebP formats.

The screenshot shows the Mindset website homepage. The page features a large banner with several portraits of people, a central video player with a portrait of a man named Vernon, and sections for 'Play Now', 'Watch Trailer', 'Overview', 'Boosters', and 'Gallery'. Below the main content, there are logos for TIME, Hollywood Reporter, billboard, reemVOGUE, Forbes, AP, and TC. To the right of the website, the developer tools Network tab is open, showing the network traffic. The 'All' filter is selected, and the timeline shows several requests. The resources listed in the table include various scripts, stylesheets, fonts, and images, all with sizes under 500 bytes. A summary at the bottom indicates 82 requests, 1.4 MB transferred, and 13.1 MB resources.

32 of 32: Showcase your Biggest Challenge

Answer these questions:

- a) What was your biggest challenge or struggle with the project so far?
- b) If you overcame it, how did you do it?

- Implementing an accordion without JavaScript turned out to be easier than I expected.
- I found a way to create an accordion using only css, and I applied a transition effect as shown below.

```
.accordion:focus + .accordion-content {  
    transition: 2s;  
    max-height: 300px;  
}  
  
.accordion:focus > .accordion-arrow {  
    transition: 0.7s;  
    transform: rotate(180deg);  
}
```

BIGGEST CHALLENGE

Frequently Asked Questions

What is Mindset?

Mindset is a daily self-care app designed to make daily self-care easy, accessible, and normalized through storytelling and story sharing.
